— Special **SYMPOSIUM** —
& training **WORKSHOP** 2026

Study and management of terrestrial invasive vertebrates
in the insular Caribbean

22-24 SEPTEMBER 2026

LE GOSIER, GUADELOUPE

Three days of scientific exchange and regional cooperation
to address a major biodiversity challenge in the Caribbean.

EVENT OVERVIEW

In response to the vulnerability of Caribbean biodiversity to invasive terrestrial vertebrates, this event aims to strengthen regional capacity, promote knowledge sharing, and foster cooperation across the insular Caribbean.

The programme will combine

- Scientific presentations and plenary lectures
- Training sessions on tools and methodologies
- Round-table discussions on ethics, policy and regional cooperation

Keynote Speakers

- Dr. Rafael Borroto-Páez (Instituto Cubano de Biodiversidad, Cuba)
- Prof. Aileen Mill (Newcastle University, United Kingdom)
- Dr. Roger Pradel (CEFE CNRS, Montpellier, France)
- Francis Reyes (Ministry of Environment and Natural Resources, Dominican Republic)

Call for abstracts

Present your research on invasive terrestrial vertebrates to an international audience of researchers and conservation practitioners!

Information & registration

Early bird registration fees:

- **Standard:** 360 €
- **Student:** 230 €

Secure your spot!

Early bird rates available until July 31.
